DEAR TRAVELER,

I don't know anything about your newsfeed, obviously, but mine has a lot about these subjects—climate and environmental news, and attitudes about travel. We all know that the world's climate is changing. We are beginning to realize more broadly that behavior shifts can and should help mitigate negative effects. And I believe we may also be at a tipping point as it relates to vigorously developing alternative sources of energy—which could positively alter the trajectory of our collective fate.

Travel, it seems, has become a target as we grapple with absorbing the realities of climate change. I'm reading an increasing number of articles about travel's contribution to the problem of climate change, and very few about the positive effects of travel.

I've been in the business of travel for a long time, both as it relates to the environment and to people's desires to understand and explore the world. On the one hand, there is no question that travel creates CO2 emissions, and that's a negative. On the other hand, the emissions generated by travel can be quantified, calculated, and offset. Realistically, even remaining at home we emit carbon, and the means to effectively offset it is far less apparent. As a company, by the way, we offset all of our ships' emissions, crew and staff travel, and offices. We have created a mechanism for those who travel with us to offset their travel if they so choose. And there are other ways we can mitigate the negative. (See pages 6-7 for more.)

But, perhaps more importantly, what would happen globally if we just stopped traveling? Think about it—what would happen to wildlife and natural habitats? Many would disappear. If tourists didn't visit and provide value to the Serengeti, it would likely turn into a corn field or ranch land. If travelers didn't visit the orangutans in Borneo, perhaps all of their habitat would have, by now, been lost to palm oil plantations. Approximately 100 million sharks are killed each year, mostly for their fins. The prospect of shark tourism providing even greater monetary value has spurred several countries to create marine protected areas. What about knowledge? Travel is in many ways the world's classroom. We develop understanding, empathy, and new ways of thinking, even living, through travel, not to mention the sheer joy and spiritual awakening it can provide. And, how many jobs would be lost, by whom and with what impact? Check out this article from the World Travel & Tourism Council: [bit.ly/TourismProvidesJobs](https://bit.ly/TourismProvidesJobs).

Certainly, travel as an industry is far from perfect, and at times extremely negative. I could write volumes about aspects that could be changed for the better. But the key question for us all to consider is: do we help our future by traveling, or not?

I believe we should travel, learn, take what we see and hear to heart. I believe we should care and seek creative ways to act on behalf of future generations to protect the world's beauty, cultures, and biodiversity. If we do that, I am convinced, the good will far outweigh any bad. I hope you agree and choose to travel with us and share in the adventure—the celebration of nature, wildlife, and human diversity—that our expeditions are all about.

All the best,

Sven-Olof Lindblad

# OUR COMMITMENT TO SUS

Back in January 2019, we took a stand, becoming a 100 percent carbon neutral company, offsetting the carbon emissions of our fleet, employee travel worldwide, offices in New York and Seattle, all land-based operations, and beyond. We eliminated single-use plastic fleet- and offices-wide, too. And we've embarked on several new initiatives. Here's what we're up to.

Glide, an eco-friendly company located in Salt Lake City, manufactures our fleet of stand-up paddleboards. Glide sources foam for their boards from across town and picks up the scraps to reuse and recycle. In addition, Glide created custom non-toxic pads for our boards. So, guests exploring via SUP can paddle secure in the knowledge they're on the most environmentally responsible SUP afloat.

*Glide SUPs are made with plant-based Entropy Bio resins, sourced from the waste stream of the biodiesel fuel and paper production industries. Using no toxic, lead-containing automotive coatings, Glide's finish has the lowest negative environmental impact in SUP manufacturing.*

Introducing the world's first self-disinfecting ships! For a full year *National Geographic Explorer's* Hotel team has been trialing a revolutionary disinfection technology: Premium Purity™, a combination of two synergetic products, ACT CleanCoat™ and ACT ECA System™. Using sunlight and a proprietary catalyzing mechanism for disinfection, and water and salt for cleaning, Premium Purity™ achieved stats impressive enough to warrant a fleet-wide roll-out:

- Reduces guest-reported illness by 50 percent
- Eliminates exposure to toxins for our cleaning staff, and potential allergens for our guests
- Reduces water usage by approximately 1.1 million gallons per year (fleet-wide)
- Removes 1,000 single-use plastic bottles from the cleaning process annually (fleet-wide)

Every cabin aboard every ship in our fleet is equipped with a pen (because post-cards and foreign stamps are forever cool!). The pens were shipped in plastic. When we said 'Sorry, no,' the vendor said 'Impossible.' However, faced with no further orders, they discovered new possibilities. When you're committed to sustainability, positive impacts result!

# TAINABILITY IS NON-STOP

We're committed to buying locally wherever possible. This is good for local farmers and fishermen, and for the environment when there's less to ship by air. In Galápagos, we're making real progress. In 2018, 15.9 percent of our ships' provisions were purchased locally in Galápagos. In 2019, nearly 27 percent of provisions were sourced locally. And, as we are in the process of starting a new relationship with a local fish co-op, our locally purchased stats will grow. This not only supports the local economy; it helps to preserve the Galápagos eco-system by reducing the threat of invasive species entering through imported food and goods.

In conjunction with South Pole, the world's leading developer of international emission reduction projects, we developed an online  carbon calculator for guests to use if they wish to carbon offset their flights to and from our ships. Simply enter flight details, and it tallies the carbon emissions, the offset cost (often surprisingly low), and provides a choice of projects—renewable energy (solar/wind), reforestation, or community projects—to invest in to mitigate the footprint. **Find it at [expeditions.com/carbon-calculator](https://expeditions.com/carbon-calculator).**

We go to the planet's premier places to see wildlife, and often enjoy thrilling up-close encounters. However, we always maintain an appropriate distance from all animals, whether we're in the field or observing from the ship, respectfully maintaining the distance even when the animals choose to approach. And we withdraw at the least sign of animal discomfort. The photos shown in our brochures are taken by Lindblad Expeditions and other photographers, including our guests, using high-end lenses that can create the illusion they are 'too near' the animal. Enjoy these stunning, up-close images, secure in the knowledge that skill and technology, not invasive closeness, produced them.

Our Antarctic (and new inaugural Arctic) parka once shipped in plastic. Now each parka arrives in a reusable bag, thanks to the forward and responsible thinking of our partners at Ship to Shore. As the bag states, it can be re-used as a laundry bag, for beach cleanups, storage, and other practical uses. Now guests can feel doubly good about their Lindblad Expeditions polar parkas!

# VOYAGE TO THE GREAT BEAR RAINFOREST: NATIVE CULTURE & WILDLIFE IN THE LAND OF THE SPIRIT BEAR

8 Days/7 Nights—Aboard *National Geographic Venture*

Sail beyond Alaska into the narrow, winding fjords of northern British Columbia and enter the domain of the rare Spirit Bear. Also known as a Kermode bear, this variant of the North American black bear can only be found in the pristine wilderness of the Great Bear Rainforest. Roughly the size of Ireland and one of National Geographic's "Places of a Lifetime," this area stretches 250 miles across the central and northern coast of British Columbia and encompasses a quarter of the world's coastal temperate rainforest. It is also home to First Nations people who have been there since time immemorial. Hike along its salmon-rich streams, enter forests of towering cedars, and see the protected region's abundant wildlife.

## EXPEDITION HIGHLIGHTS

- ▶ Take kayaks and Zodiacs deep into verdant fjords and along wildlife-rich shores, keeping your eyes peeled for foraging bears, grey wolves, pods of killer whales, and more.
- ▶ Journey into remote, protected lands and experience the silence as you stand among towering cedars.
- ▶ Learn the human history of the region from our cultural interpreter and fascinating First Nations museums.
- ▶ Witness the surprisingly colorful undersea through video shot by our undersea specialist.
- ▶ Celebrate this inaugural season in the company of large carnivore ecologist and Dr. Rae Wynn-Grant as she shares her experience studying the bears in the region.

## EXPERT

Our inaugural voyages into this region will be joined by carnivore ecologist **Dr. Rae Wynn-Grant**. Dr. Wynn-Grant has been awarded a grant to study spirit bears in the region and will be on board to give lectures and provide cutting-edge information. She was recently featured in the documentary *Women of Impact: Changing the World*. Join her on the **Sep. 15 or 22, 2020** departure.

Get immersed in First Nations history at the Museum of Northern British Columbia, built in the style of a coastal longhouse. Breathe in the scent of cedar beams and peruse an impressive collection of ornate carvings, weavings, ceremonial objects, and regalia. Visit the North Pacific Cannery Museum, a collection of cannery buildings located in a pristine wilderness surrounding that highlights British Columbia's economic, cultural, and natural development over the last century. (B,L,D)

**DAYS 3–6: EXPLORING GREAT BEAR RAINFOREST**

Over the next four days, we will cruise deep into the fjords and deep valleys that carve into the Coast Range looking for black and grizzly bears. We will be accompanied by a cultural interpreter who will share with you the legends of their people. Circumnavigate Gribbell Island, dubbed "Mother Island of the White Bear," in search of this elusive bear. It is believed that between 10-20 percent of bears in this region are born with the recessive gene

that causes the white fur; fewer than 400 are estimated to exist. Almost 15 percent of the land in British Columbia is protected, with a wide range of provincial parks, national parks, and UNESCO World Heritage Sites. We will go ashore and explore several remote locations where few people venture. Discover hidden gems by Zodiac and kayak, navigating the tidal narrows that lead to the spectacular Gilttooyes Inlet and gliding into rugged valleys of Owyacumish Bay—all while constantly scanning the rocky shoreline for bears. (B,L,D)

**DAY 7: CRUISING/LOWE INLET PROVINCIAL MARINE PARK**

Sail alongside pods of killer whales and see foraging brown bears as we sail north through the narrow Grenville Channel, a dramatic navigational experience. Not only does the channel narrow to less than a quarter of a mile across, but a slight bend in the passage makes the waterway seem to disappear into the hills ahead and behind the ship. If conditions allow, we will drop our Zodiacs and kayaks to explore the salmon stream at Verney Falls in Lowe Inlet Provincial Marine Park on our way to Ketchikan. (B,L,D)

**DAY 8: KETCHIKAN, ALASKA**

Return to Ketchikan and disembark the ship after breakfast. Transfer to the airport for your return flight home. (B)

Upon arrival in Loreto, transfer to San Carlos and embark our ship. Tonight, we'll anchor off the coast of Isla Santa Margarita. (D)

**DAY 2: BAHÍA ALMEJAS/REHUSA CHANNEL/ISLA MAGDALENA**

Awake in Bahía Almejas, the southernmost part of the Bay. We'll observe a large frigatebird colony enroute to the spectacular whale grounds of Bahía Almejas. Whales here tend to be very active, seemingly oblivious to our presence, so settle in for some great experiences. Later we'll reposition to Isla Magdalena to explore the ever-shifting sand dunes on a cross-island walk to one of the most pristine beaches in the Pacific. Bird-watching can be excellent here. (B,L,D)

**DAY 3: BOCA DE SOLEDAD**

Each winter, gray whales travel south from their Arctic feeding grounds to breed, give birth, and raise their calves in these sheltered waters. We'll spend the full day interacting with these majestic creatures. Together with savvy local Mexican fishermen, we'll venture out in local pangas to view the numerous mother-calf pairs. We will likely encounter a variety of shorebirds feeding voraciously on the shoreline while frigatebirds and pelicans soar overhead. (B,L,D)

**DAY 2: BAHÍA MAGDALENA**

Explore the ever-shifting sand dunes of Isla Magdalena, on a cross-island walk to one of the most pristine beaches in the Pacific. Bird watching in this area can be excellent. We may observe pelicans and cormorants skimming the waters of the bay, or terns wheeling and darting as frigatebirds ride the thermals above, looking for an easy meal. Along the beaches, resident great blue herons feed on these fertile shorelines next to migratory shorebirds, including whimbrels and willets, as they refuel for their northbound journeys. (B,L,D)

Gray whale, Laguna San Ignacio.

**DAYS 3 & 4: LAGUNA SAN IGNACIO**

Laguna San Ignacio is a large bay and favored haunt of the gray whales in Baja. The ship will anchor at the mouth of this remote and important locale, while we observe the mother and calf pairs in local pangas. For some reason, the whales here seem to be friendlier than they are elsewhere. It's not unusual for mothers and calves to approach our boats, the calves often playing hide and seek—sometimes even welcoming a touch or a friendly chin scratch. (B,L,D)

**DAY 5: AT SEA**

As we travel south along the Pacific coast of the peninsula, there is a chance of seeing a wide variety of marine life. (B,L,D)

**DAYS 6–14: ISLANDS OF THE SEA OF CORTEZ**

Cruise past the spectacular Friars Rocks at Land's End. For those who wish, we will arrange a visit to the historic town center of San José del Cabo. Isla San Pedro Mártir, Los Islotes, Isla San Francisco—these are some of the melodious names of islands scattered throughout this beautiful sea. After over 40 years of exploration here, we are still discovering new places and experiencing exciting events: bow-riding bottlenose dolphins, or sperm whales near our ship; a pod of fin whales feeding around a convergence zone; or perhaps, with luck, the largest animal on earth—the blue whale. The best areas for whale watching remain consistent—the waters south of Isla Carmen, Canal de Ballenas up north, and near the mouth of Bahía Concepción. Whether on the Bridge of the ship, in Zodiacs, or kayaks, we will be in prime position to observe them all. (B,L,D)

**DAY 15: LORETO/DISEMBARK/U.S.**

Disembark in Loreto after breakfast and transfer to the city center. You'll have the opportunity to visit the first mission in Baja California, as well as the nearby museum to learn more about what makes this town so special. # EXPLORING THE SEA OF CORTEZ: A LIVING SEA & DESERT ISLES

8 Days/7 Nights—Aboard *National Geographic Venture* and *National Geographic Quest*

The pristine desert islands dotting the Sea of Cortez are places of incredible biodiversity set amid a UNESCO World Heritage Marine Site dubbed “the world’s aquarium” by Jacques Cousteau. Each of these islands is a world unto itself, with a palpable feel of rugged isolation. Hike among forests of cacti and along desert *arroyos* in bloom as you search for endemic flora and fauna. Watch for swirling plunge-diving brown pelicans, blue-footed and brown boobies, and the frenetic aerial activity of gulls and terns that often alerts us to large pods of acrobatic dolphins. With a flexible itinerary, decades of experience, and deep knowledge of wildlife habits, this unique journey combines the beauty and biodiversity of this legendary region with a stimulating sense of adventure.

## EXPEDITION HIGHLIGHTS

- ▶ Experience a voyage of pure discovery in a UNESCO World Heritage Site, with a flexible itinerary chosen by the region’s most knowledgeable staff to maximize wildlife sightings.
- ▶ Venture further north in the Sea of Cortez to explore remote and seldom visited islands, such as Isla Rasa, a breeding ground for 90 percent of the world’s Heermann’s gulls and a large population of elegant and royal terns.
- ▶ Search for pods of dolphins and other marine life. With luck, catch a leaping mobula ray as they eject from the sea and belly-flop back in the water.
- ▶ Explore water-level caves by kayak, hike uninhabited beaches, stand-up paddleboard, and snorkel among tropical fish and acrobatic sea lions.

**DAY 1: U.S./LORETO/EMBARK**  
 Arrive in Loreto and embark our ship. (D)

**DAYS 2–7: EXPLORING THE SEA OF CORTEZ**

Our routing is designed with flexibility in mind, to maximize opportunities for wildlife sightings. It will most likely include the islands and activities listed below, although the order may vary. (B,L,D)

**ISLAS SAN ESTEBAN AND SAN PEDRO MÁRTIR:**

Walk up a desert wash, to search for desert songbirds such as the handsome black-throated sparrow, listen for the cascading song of the canyon wren and search for the endemic pinto chuckwalla—a plump, harmless desert lizard. Later visit Isla San Pedro Mártir, a 1,000-foot-high guano-covered island that is home to thousands of seabirds: brown pelicans, magnificent frigatebirds, Brandt’s cormorants; and California sea lions.

**ISLA SAN MARCOS:**

At Isla San Marcos, there is a beautiful shoreline for swimming, snorkeling, and kayaking. In the afternoon, we are again in rich waters. We are on the lookout for pods of dolphins—with common and bottlenose being the most frequently encountered species. With luck they will join us as we go, riding the bow wave and sometimes leaping from the water.

**ISLA SAN JOSÉ:**

One of the larger islands in the Sea of Cortez, San José, offers several landing possibilities depending on conditions and the whim of the moment. Photograph the ochre cliffs of the island’s eastern shore, hike an “enchanted,” cactus-laden *arroyo*, or visit the abandoned salt works to the west.

**BAHÍA LORETO MARINE PARK:**

This morning we’ll search the waters south of Isla Carmen for fin whales, which researchers have recently concluded may be a resident population. Bottlenose and common dolphins are frequently encountered. Later we visit an island of Bahía Loreto Marine Park, with ample time for kayaking, snorkeling, stand-up paddleboarding, and possibly hiking. In the evening, enjoy a beach barbecue under the desert sky.

**ISLAS LOS ISLOTES AND SAN FRANCISCO:**

At Los Islotes, don flippers, a mask and snorkel and swim with curious sea lions. We have a leisurely afternoon to swim, kayak, or hike at Isla San Francisco. Look skyward for yellow-footed gulls, brown pelicans, and blue-footed boobies.

**DAY 8: LORETO/DISEMBARK/U.S.**

Disembark and explore Loreto, where we will have the opportunity to visit the first mission in Baja California, as well as the nearby museum to learn more about what makes this town so special. Enjoy free time to explore quaint shops and vibrant side streets. After lunch, transfer to Loreto Airport for flights home. (B,L)

# U.S. FLAGGED VESSELS: EXPLO

Every cruise company builds ships abroad—in Europe, Scandinavia, and now, China. We could've too. But we decided to build these four expedition ships in America, at a family-owned shipyard in Whidbey Island, Washington. Why? To be U.S.-flagged, with all the advantages that entails in Alaska, the Pacific Northwest, and the California coast. No traveler thrilled to be exploring Alaska—as we do with our guests each year, in depth, for the entire glorious spring into autumn season—wants to give up time amid wildness and wonder to go clear customs in Canada, as all the foreign-flagged ships must do. Aboard our U.S. fleet ships, they don't have to. Instead, they're going deep into the heart of the magic every day. Our U.S.-flagged ships offer unique advantages and create extraordinary opportunities for adventurous guests. And as an interesting detail: each twin pair is identical. So, travel on one, return to travel again on the other and feel instantly at home!

National Geographic Quest in Alaska.

# RING PAN-AMERICAN WATERS

With their young American crew and international staff, our four small U.S. ships are scaled to go where big white ships can't to experience what they don't. Both twins enjoy similar advantages—scale, nimbleness, constant connection to the great outdoors, and outstanding expedition teams.

The 31-cabin *National Geographic Sea Bird* and *National Geographic Sea Lion* go to remote places, and offer an immediacy and intimacy with the landscapes—reflected in the itineraries for which they are so perfectly adapted. For example, in Baja, only *National Geographic Sea Lion* and *National Geographic Sea Bird* can anchor inside Magdalena Bay, a nursery for gray whale mothers and calves. Venture out in our expedition landing craft for encounters with these curious gentle giants; and enjoy the exclusive experience of leaning on a deck rail, seeing or hearing the whales moving and breathing around the ship. Magic. The 50-cabin *National Geographic Quest* and *National Geographic Venture* were built with amenities and onboard technology that enables all-five-senses exploring, and the ability to cover greater distances—reflected in their wider-ranging itineraries—while still using their small scale to their advantage to access intriguing coasts, waterways, and island archipelagos.

When it comes to the ships of our U.S. fleet, it is less a matter of which ship to prefer than what itinerary or set of experiences you want. You can rest assured that each set of twins is ideally equipped to enable up-close and personal explorations—and to provide an unforgettable adventure.

# PANAMA & COLOMBIA: EXPLORING THE CARIBBEAN COAST

8 Days/7 Nights—Aboard *National Geographic Quest*

Bursting with biodiversity and comprised of a multitude of cultures, Colombia is an extraordinarily rich land. Sail the Caribbean coast to see the region's ecotourism efforts, and learn about the country's past and native peoples, including the Embera and Zenu, as well as those who arrived later—pirates, Spanish colonials, and modern-day immigrants. In Panama, transit the incredible canal and explore the pristine Guna Yala islands. Reflecting the diversity of these countries, our expedition offers jungle hikes, walking tours of historic towns, and opportunities to explore turquoise waters and coastal mangroves via snorkel, kayak, Zodiac, or stand-up paddleboard.

## EXPEDITION HIGHLIGHTS

- ▶ With over 1,900 species of birds—more than any other country—and an astonishing 450 mammals, Colombia has an overwhelming variety of flora and fauna to see as we explore on naturalist-led jungle hikes.
- ▶ Transit the Panama Canal—a modern engineering marvel.
- ▶ Visit Guna Yala—once known as the San Blas Islands—to experience the archipelago's Guna culture and uninhabited cays.
- ▶ Explore idyllic islands, snorkel vibrant coral reefs, and search for wildlife in healthy mangroves.
- ▶ Get an insider's look into the Smithsonian Tropical Research Institute's work to uncover the mysteries of tropical ecosystems, while you assist biologists in their research.

## EXPERT

*Cartagena, Colombia.*

**DAY 1: U.S./PANAMA CITY, PANAMA/ BALBOA/EMBARK**

Upon arrival in Panama City, transfer by land to Balboa and embark *National Geographic Quest* to transit the Panama Canal. Head up on deck to feel the warm, tropical breeze as you experience the dramatically lit, man-made marvel. (D)

**DAY 2: GATÚN LAKE**

Anchor overnight in Gatún Lake during our canal transit. Through our long-standing association with Smithsonian Tropical Research Institute, we have special access to research facilities on Barro Colorado Island, and will meet with biologists helping to gather data on tropical ecosystems. Afterward, choose from hikes, Zodiac cruises, or a boat ride to the mouth of the Chagres River for a rainforest hike. In the evening, we'll continue through the lock system of the canal. (B,L,D)

**DAY 3: PORTOBELLO**

Dubbed the "beautiful port," we arrive this morning along the Caribbean coast of Panama and step ashore at Portobelo, complete with a dynamic and colorful past. We land our Zodiacs on the very same shores where the ruthless pirate Henry Morgan landed, later to be followed by the British and Spanish colonial rulers. Our exploration today will take us on a journey through the past into Spanish colonial fortifications of the area, designated by UNESCO as World Heritage Sites. Later, we hike into Portobelo's lush jungles in search of mantled howler monkeys, toucans, and a variety of parrots. In the afternoon, *National Geographic Quest* repositions down the Panamanian coast and we set out with snorkel, mask, and fins to explore the multi-colored undersea world of the Caribbean. (B,L,D)

**DAY 4: GUNA YALA**

Wake up amid the archipelago of Guna Yala (also known as the San Blas islands), a constellation of 368 tiny, white-sand isles scattered off the northeast coast of Panama. Get to know the indigenous Guna people, one of the first native groups to achieve political autonomy in Latin America. Spend the morning among the thatched huts of an island village, learning about Guna culture and handicrafts. Marvel at the intricate designs of handmade textiles called molas, which harken back to a female tradition of body painting. In the afternoon, explore the vibrant marine world around the islands by snorkel, kayak, and stand-up paddleboard. (B,L,D)

**DAY 5: NECOCLÍ, COLOMBIA**

Discover the little-explored coastal community of Necoclí and the surrounding region. Our exploration begins with Zodiac excursions into lagoons fringed by mangroves, part of a protected coastal wetlands area. Keep an eye out for wildlife, including a variety of colorful bird species such as great and snowy egrets, and Amazon and green kingfishers. After lunch, visit a local cocoa farm, where residents are striving to incorporate the UN's Sustainable Development Goals into their agricultural community. (B,L,D)

**DAY 6: SANTA CRUZ DEL ISLOTE/ SAN BERNARDO ARCHIPELAGO/SAN ANTERO/TUCHÍN**

Santa Cruz del Islole is one of the most densely populated islands on Earth, where some 600 inhabitants live squeezed together in an area the size of two soccer fields, surrounded by turquoise seas and coral reefs. Stroll the island's motor-free streets, past brightly painted houses and bustling docks; and experience daily life on this unusual island as you chat with local residents. Later, we cruise through the San

Bernardo archipelago calling at San Antero. Our afternoon excursion takes us to Tuchín, an indigenous village celebrated as the birthplace of the sombrero *vueltaio*, a type of hat considered a national symbol of Colombia. Observe *vueltaio* makers at work, and then meet with members of the local Zenú community, known for their ingenious irrigation systems. (B,L,D)

**DAY 7: SANTA CRUZ DE LORICA/ CISPATÁ BAY**

Disembark this morning for our short drive to Santa Cruz de Loricá, a charming riverside town influenced by several waves of immigration from France, Belgium, England, Syria, and Lebanon. Stroll through the central square, overlooked by a stunning Spanish-colonial cathedral and historic buildings in colorful Arabic styles. Enjoy a late afternoon cruise in the rarely-explored Cispatá Bay, timed for optimum wildlife spotting, as native creatures emerge from their mid-day rest. (B,L,D)

**DAY 8: CARTAGENA/DISEMBARK/U.S.**

After breakfast on board, transfer to the airport for flights home. (B)

**ESPAÑOLA:** See swallow-tailed gulls, Española mockingbirds, Nazca boobies and, seasonally, the world's only population of waved albatross at this birdy paradise, also home to vividly colored marine iguanas. Watch sea lions on the wide sand beach, and snorkel offshore, at Gardner Bay.

**FLOREANA:** Follow a trail past a rose pink-tinted lagoon frequented by flamingos. Snorkel among sea lions and abundant fish, or cruise along Champion Islet by Zodiac. Visit the famous barrel at Post Office Bay.

**SANTA CRUZ:** Visit Puerto Ayora, the largest town and headquarters of both the Galápagos National Park and Charles Darwin Research Station. See the monument to Lonesome George, and tour the giant tortoise breeding corrals. See the giant tortoises roaming in the wild in the lush, green highlands.

**DAY 2: LIMA/IQUITOS/NAUTA/EMBARK**

After breakfast, fly to Iquitos and continue overland to the riverside village of Nauta, where the *Delfin II* awaits. Settle into your cabin, and gather for a welcome dinner of fine Peruvian cuisine on board. Tonight, step out on deck to gaze at the magnificent Amazon night sky. (B,L,D)

**DAYS 3–8: PACAYA-SAMIRIA NATIONAL RESERVE**

Spend this week exploring the Pacaya-Samiria National Reserve, a pristine swath of jungle—stretching more than five million acres, and harboring some of the Amazon’s most fascinating flora and fauna. Bordered by the Marañón and the Ucayali, these two powerful rivers converge to create the famed Amazon, which floods annually with nutrient-rich waters. The Pacaya-Samiria rivers are known locally as the Mirrored Forest for the reflections created by the glassy water.

Set out into this remarkable wilderness on daily excursions by skiff, kayak, and, when the water level permits, by foot on dry land. Skim past giant lily pads afloat on black-water lakes, and venture deep into the rain forest on narrow tributaries. Spot sloths and monkeys, including variably colored saddleback tamarins, noisy howlers, and shaggy-tailed monk saki monkeys. Watch for an astounding variety

of birds, from tanagers and hummingbirds to parrots and endangered scarlet macaws. In the river, look for signs of the massive *paiche* fish, the Amazon’s largest; rare pink dolphins; and the infamous piranhas.

Enjoy an opportunity to swim in a lake in the reserve’s interior. Seek out *Victoria amazonica*, a giant water lily that grows in small lagoons. Go on a birdwatching hike, listening for the vocal oropendola and then look for its telltale yellow tail. Watch the sun set and listen to a cacophonous symphony of nocturnal animals calling out across the treetops. Then slip through the forest in a skiff as night falls, using a spotlight to find caimans, frogs, fishing bats, and other creatures of the night.

One of the unexpected joys of traveling in the upper Amazon of Peru is the interaction we have with the local *riberieños*, the traditional people who live on the riverbanks. Visit one of the communities and see the projects that we support through a local non-profit, including a variety of handicrafts, women’s health initiative, and sustainable farming. (B,L,D)

# ICEMASTERS OF THE POLAR FLEET

Collectively, the Captains of the Lindblad Expeditions fleet have navigated over 500 Antarctic expeditions, ensuring they have the crucial knowledge we demand. They are extraordinary mariners. And along with their Officers, they are keen spotters, as interested in observing birds, whales, orcas, narwhal, polar bears, leopard seals, and penguins as our naturalists and guests. That's why their Bridges are open and inviting. Hang out, observe their navigation, enjoy the playlists—their domain, expertise, and engaging personalities are integral to the fun of your expedition.

## CAPTAIN LEIF SKOG

Leif Skog, Lindblad V.P. Nautical, has been a member of IAATO (International Association of Antarctic Tour Operators) since 1998 and served as Chairman of the IAATO Marine Committee for five years, developing safety and emergency procedures, ensuring that all IAATO ships operating in the region keep in daily touch to form the initial response for any incident.

To recognize Captain Leif Skog's 'significant and sustained contribution in this field,' the U.K. Antarctic Place-names Committee recently approved the name **SKOG BAY** (66.53° S, 66.28° W).

### CAPTAIN OLIVER KRUESS

Oliver has been aboard expedition vessels since 1991, rising to command as a ship's Master in 1995. For nearly 20 years, he has been navigating polar waters, crossing the Antarctic convergence about 140 times, and logging north of the Arctic Circle in the Atlantic and Pacific more than 60 times. In total, Oliver has joined nearly 450 expedition cruises worldwide, including 10 years of South Pacific expeditions. An extraordinary mariner, he also has exceptional naturalist skills. He can circle his ship in slow steady arcs to keep a pod of hunting killer whales in steady view, or sight a bear on the Arctic pack ice before the on-duty spotter, making his Bridge a constant hub for guests. Captain Kruess has also served as a representative at IAATO and most frequently captains *National Geographic Explorer*.

### CAPTAIN AARON WOOD

Working at sea since leaving school, sailing cargo ships, oil vessels, and luxury ocean liners up to 2014, Aaron received an opportunity he couldn't refuse—expedition cruising with Lindblad Expeditions. Since then, he has navigated his ships worldwide and through the Antarctic Circle and polar waters as Navigation Officer, Safety Officer, Staff Captain, and today, Captain. A certified advanced ice navigator, Captain Wood has demonstrated extreme ice savvy in polar conditions and a passion for collaborating with his expedition leaders to create exceptional observations for guests. He recently completed technical training in next-generation ice-class navigation and tech systems to assume his new role as Captain aboard our brand-new Polar Class 5 vessel, *National Geographic Endurance*.

### CAPTAIN HEIDI NORLING

The first woman to captain a Lindblad Expeditions ship, Heidi began sailing in the Stockholm archipelago as a teenager. Working as a cadet aboard Swedish cargo ships, navigating from the Great Lakes and the North Sea to the Mexican Gulf, her career launched in earnest aboard the expedition yacht *Hanse Explorer*, where she conducted a series of adventurous seasons in Antarctic ice. Back in Visby, Sweden on a break, she spotted her dream ship, *National Geographic Orion*, docked in the harbor. Mere months later she came aboard, and has since sailed *National Geographic Orion* to the South Pacific, Antarctica, Arctic, Alaska, and the Russian Far East.

### CAPTAIN MARTIN GRASER

Martin credits his 27 years of sea service to a long-standing passion for ice navigation and expedition travel, beginning in his childhood sailing the North and Baltic Seas aboard his father's hand-built boats. He began his career aboard the expedition yacht, *Hanse Explorer*, where he served from 2006 to 2015. Over the years, he has conducted many adventurous charters, including the 5-week Pristine Seas expedition led by Dr. Enric Sala. Captaining *National Geographic Orion* since 2015, he is about to assume command of *National Geographic Endurance*, the most technologically advanced ice-class polar vessel in the world, taking the ship halfway around the world and deep into the polar ice.

# AZURE SEAS FROM TAHITI TO THE MARQUESAS

17 Days/14 Nights—Aboard *National Geographic Orion*

Remote and enigmatic, the Marquesas are islands that belong to the past. Some of them virtually untouched since the era of European exploration, their isolation has given way to a proud people whose unique Marquesan dialect is a direct link to the ancient Polynesian language of Maohi. Indeed, it is believed locally that the spirits of the ancient Maohi live among the islands' saw-toothed peaks and lush, verdant valleys, and the limestone caves and grottos that we'll explore. Herman Melville penned his novel *Typee* based on his time on Nuku Hiva and established himself as the "man who lived among the cannibals," and Robert Louis Stevenson landed here aboard his yacht *Casco* in the late 19th century.

## EXPEDITION HIGHLIGHTS

The atoll of Rangiroa is a ring of slender islands known for some of the best diving and snorkeling in French Polynesia. The turquoise lagoon at its center is the second-largest in the world. Our ship passes between the islets to anchor inside the lagoon near the village of Tiputa, where local musicians greet us. Visit the village and kayak, snorkel, and scuba dive in the rich waters here, home to large schools of pelagic fish, manta rays, dolphins, and sea turtles. Snorkelers will revel in the protected reefs of gorgeous Fakarava, one of the largest atolls in French Polynesia and part of a UNESCO Biosphere Reserve.

Be sure you're on deck and camera-armed as we arrive at one of the most storied shorelines in the entire Pacific. Enjoy a warm Polynesian welcome on a visit to a remote village where you'll see displays of well-made, uniquely Marquesan arts and crafts. Choose a challenging hike through landscapes studded with sculptural granite and stunning flora to a remote waterfall, or Zodiac to the next bay where local transport takes you birdwatching deep in the Omoa Valley. (B,L,D)

If you read Herman Melville's *Typee* in prep for your voyage, you'll thrill doubly to the green-mantled, rugged silhouette of Nuku Hiva, the largest and most imposing of the Marquesas. Visit ancient petroglyphs and witness a spectacular dance performance at a Marquesan me'ae, or hike up the valley with the naturalists and local guides in search of rare birds and spectacular views. Later, sample local foods in the village, and peruse unique arts and crafts. (B,L,D)
